SUMMARY

Motivated Java Backend Developer skilled in Core & Advanced Java, Spring Boot, REST APIs, and Microservices. Hands-on experience building real-world applications using MySQL and layered architecture. Strong problem-solving ability with interest in backend system design and full stack development.

SKILLS

Programming	Java (OOP, Collections, Exception Handling)
Backend Frameworks	Spring Boot, Spring MVC, Spring Data JPA
Web & Server	Servlets, JSP, JDBC
Microservices	REST APIs, ModelMapper, DTOs, RestTemplate
Database	MySQL
Tools	Git, Postman, IntelliJ IDEA, Eclipse, VS Code, Apache Tomcat

PROJECTS

SmartTrip – Travel Insights Microservice System
Developed User & Trip microservices using RestTemplate. Implemented clean layered architecture with DTO mapping.

Student Management System
Spring Boot CRUD system with REST APIs and MySQL backend. Used layered MVC architecture for maintainability.

Crypto Price Tracker API
REST API to fetch live cryptocurrency data. Implemented JSON parsing and exception handling.

Customer & Address Microservices
Designed independent microservices communicating via REST with separate databases. Used DTO mapping for secure data transfer.

E-Commerce Microservices Application
Product, User, and Order services with independent DBs. Used RestTemplate and ModelMapper for inter-service communication.

Employee Portal (Servlets + JSP + JDBC)
CRUD employee management system using MVC pattern and MySQL database.

EDUCATION

B.Tech in Computer Science & Engineering, Vaageswari College of Engineering (2021–2024), CGPA: 6.65
